Until you're this tall, you're safer in a booster seat

Measure your pre-school or school-aged kids against Booster Rooster's height chart. If they're under 148cm, they need to be in a booster seat to get the full safety benefits of an adult seat belt.

It is generally accepted that children under the height of 148cm should be seated in an appropriate child restraint\*.

\* NZ Transport Agency, Child Restraints (Factsheet 7)

↑  
**THE HIGHER YOU SIT THE SAFER THE FIT!**

→ **Take the 5-Step Test**

If you answer 'no' to any of these questions, your child needs to be in a booster seat.

- ① Does your child sit all the way back against the car seat?
- ② Do your child's knees bend comfortably at the edge of the car seat?
- ③ Does the belt cross the shoulder between the neck and the arm?
- ④ Is the lap belt as low as possible, touching the thighs?
- ⑤ Can the child stay seated like this for the whole trip?

### Booster Rooster Reminders

Always read the product manual before buying a booster seat or child restraint.

All booster seats and child car restraints must meet approved standards.

Information on renting, buying and installing booster seats and child car restraints is available from Plunket, car seat retailers and at [www.safe2go.co.nz](http://www.safe2go.co.nz).
